Standard Erosion and Sediment Control Plan Application
 Single Family Residential Lot(s) and Minor Commercial Addition

Qualifications

Article-Environment, Title 4, Subtitle I, Annotated Code of Maryland, and Chapter 17.08 of the Annapolis City Code require that provisions to control erosion and sediment shall be included for all development where any excavation, stripping, filling, grading or earth movement takes place. As required by state law, building and grading permits cannot be issued until such erosion and sediment control provisions are approved. For minor earth disturbance, not requiring storm water management, this agreement may be used to satisfy sediment control requirements in lieu of submitting an engineered sediment control plan, provided that all conditions of standard plan can be met. Otherwise the applicant is required to obtain sediment control plan approval directly from the Anne Arundel Soil Conservation District.

Grading permit number _____
