Senior Land Use & Development Planner

From: Michael M. Pristoop
Chief of Police

Date: 11-09-2016

Subject: Special Exception & Site Plan Review
TrakIt No.: SE2016-007
Annapolis Regional Library

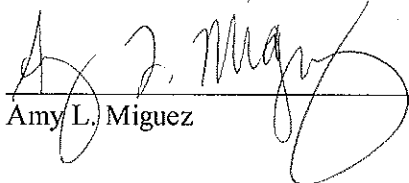

With respect to the above captioned matter, staff reviewed the proposal for a new library on the same lot as the existing library and made the following observations: There are no additional comments or conditions we would impose from a law enforcement perspective, with respect to this request under Adequate Public Facilities.

Staff reviewed the population in the immediate area and citywide to determine if our current staffing was adequate to provide police protection to this project. Based on our ratio of officers to the population we fall within acceptable range for staffing.

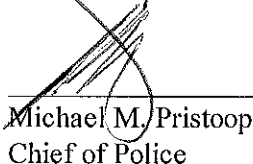

We are satisfied that response times to calls for service will fall into the acceptable range. There would no increase in the residential population so this project will not adversely impact response times. The proposal is not expected to increase traffic congestion on the public streets.

Based on the above criteria, it was determined that staffing is adequate, police response times would reasonably fall into the norm for response times.
